Medium of Instruction: English Abbreviations: ESE- End Semester Exam, PA- Progressive Assessment, L - Lectures, T - Tutorial, P - Practical Theory and practical periods of 60 minutes each. Student Contact Hours Per Week: 32 Hrs.

@Internal Assessment, # External Assessment, *# On Line Examination

* The average of 2 test to be taken during the semester for the assessment.

@\$ Internal PR ESE and average of 2 Skill tests / Practicals. #\$ External PR ESE and average of 2 Skill tests / Practicals.

If student remaining absent in PR-ESE shall be considered as ABSENT in PR-ESE.

Candidates not securing minimum marks for passing the "PA" part of practical of any course is declared as "Detained" for that semester

GOARD OF TECHNI

During the Internship and Project period students shall attend Institute one day a week to meet the mentor and appraise about the progre Project Diary, and Internship performance shall be recorded by the mentor for progressive assessment.

Note: The Institute is required to sign MOU with related local authories for Fire Training

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

COURSE TITLE

: FIRE ENGINEERING SCIENCE

COURSE CODE

: 28114

1. RATIONALE

This subject is basic of fires. Knowledge of basic fire chemistry and its properties to understand the hazards, and severity of the flammable solids, liquids and gases materials. To extinguish the fire, basic understanding of chemicals reactions and properties are very much useful in fire extinguishment, fire investigation, decision making, research & developments at the emergency site. It is the most useful in practical work of fire emergency.

2. COMPETENCY

To study

- Different types of combustible matters.
- Basics of fire chemistry.
- Different fire extinguishing method.
- Properties of extinguishing media or agent.
- Fluid mechanics.
- And design hydraulics and water supplies for fireman.

3. COURSE OUTCOMES

At the end of this course student will be able to:

- Explain fire dynamics in enclosed and open fire situations.
- Explain fire propagation, smoke movement and its effect on surrounding.
- Know Fire Physics and Chemistry, Fire Propagation and Fire Dynamics
- Know the different physical and chemical properties of the violent material.
- Apply theory based knowledge to keep plant safe.
- Apply knowledge for life, property and environment saving.
- Solve problems in fire-related contexts by applying mathematics, mechanics, hydraulics, chemistry and electricity
- Use understanding of science to explain hazards and their potential effects
- Interpret data and carry out relevant calculations

4. TEACHING AND EXAMINATION SCHEME

@Internal Assessment, #External Assessment, *#Online Examination

5. TUTORIAL ASSIGNMENTS

Tutorials should be planned to enhance learning. The faculty shall decide suitable assignments minimum one per unit based on the curriculum.

6. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to attain the identified competencies.

| Unit | Topic and Contents | Hours | Marks |
|------|--|-------|-------|
| I | BASICS OF FIRE SCIENCE Definition of Fire, Fire Triangle, Fire extinguishing methods, Different types of extinguishing media. Water as principal extinguishing media, it's properties & limitations. Stages of Fire Classification of Fires as per Indian Standards, Common causes of fire & it's preventive measures Tetrahedron of Fire, Un-inhibition Chain reactions, Combustion chain reaction involving a free radical mechanism with the example of combustion of hydrogen, Exothermic Chemical reactions & Endothermic Chemical reactions | 10 | 10 |
| II | COMBUSTION Definition of combustion, Types of combustion, Oxidation reactions, Limits of flammability, Flash point, fire point, ignition temp., Auto ignition temp, Specific gravity, vapor density, Latent heat of vaporization & latent heat of fusion, Shouldering | 08 | 12 |

FS

| Unit | Topic and Contents | Hours | Marks |
|------------|--|-------|-------|
| | Explosive range, | | - |
| | Flammable properties of combustible materials. | | |
| | Basic combustion process, | | |
| | Specific surface and rate of combustion, | | |
| | Effects of humidity, temperature and atmospheric pressure | | |
| | on combustion | | |
| | TRANSMISSION OF HEAT | | |
| | Heat and Temperature, BTU | | |
| | Temperature conversion formulae | | |
| | _ | | |
| III | Heat transmission processes- Conduction, Convection, Radiation & it's fire risk | 08 | 12 |
| | | | |
| | Specific Heat, Calorie, Volatile liquids | | |
| | Basic ways where heat may be generated spontaneously ONTAL ONTAL | | |
| | (Without external heating) | | |
| | PRODUCTS OF FLAME | | |
| | • Definition of flame, | | |
| | • Types of Flames: Premixed flame and the Diffusion flame. | | |
| | Laminar and turbulent gas flows | | |
| | Practical examples of premixed flames and diffusion | | |
| | flames | | |
| | The Bunsen Burner & A candle flame | | |
| IV | Explosions. Burning velocity. | 10 | 12 |
| | FLAME HAZARDS | | |
| | Flash over, Back Draught, Boil Over, Spill over, | | |
| | • Unconfined Vapor Cloud Explosion (U.V.C.E.), Boiling | | |
| | Liquid Expanding Vapor Explosions (B.L.E.V.E.), | | |
| | Deep-seated fires, | | |
| | • Jet & flash fire, | | |
| | Fire cloud & Fire ball | | |
| | DIFFERENT COMBUSTIBLE MATTER | | |
| | The Ideal Gas Law | | |
| | Vapor pressure & boiling point | | |
| | Types of combustible matter, Elements | | |
| | | | |
| | Chemical compounds | | |
| | Properties of matter | | |
| | PROPERTIES AND HAZARDS OF COMMON | | |
| X 7 | VOLATILE SUBSTANCES | | |
| V | Alcohols, Xylene, Aniline, Solvent Naphtha, Ether (DI- | 14 | 12 |
| | Ethyl Ether), Ethyl Acetate, Toulon or toluene, | | |
| | Carbon Disulfide, Nitro Benzene, Propylene, Oxide, | | |
| | Inorganic and Organic Oxidizers, Inorganic peroxides, | | |
| | Hydrogen peroxide, Organic peroxides, Cyclohexanone | | |
| | peroxide, Methyl Ethyl Ketone Peroxides, | | |
| | Charcoal, Pyrophoric carbon, | - 1 | |
| | Sulphur, Phosphorous, Naphthalene, | | |
| | • Cotton. Paper, Jute, Wool, Wood, Rubber, Plastic, | | |

| Unit | Topic and Contents | Hours | Marks |
|------|--|-------------|-------|
| | Petrol and fuel oils, Drying oils, Mineral oils, Heavy Fuel Oils, | | |
| | Kerosene and Diesel Oils, | | |
| | Linoleum, Coal, Coal-tar. | | |
| | Paints, Varnish, Enamel, Lacquer | | |
| | LPG, Hydrogen, Oxygen | | |
| | HYDRAULICS | | |
| | Meaning of hydraulics, | 0.00 | |
| | • Relation between fluid pressure and water head, Concept of pressure head and numerical calculations, | | |
| | • Loss of pressure due to friction and numerical calculations, | | |
| | Atmospheric Pressure concept, | - " | |
| | Newton third law of motion | | |
| | Jet Reaction, | | |
| VI | Nozzles & back pressure, | 14 | 12 |
| VI | Water Hammer and its effects | 14 | 12 |
| | Water hammer control measures | | |
| | Heights of effective jets with calculation, | | |
| | Water Relays, | | |
| | • Fire department pumps, | | |
| | • Fire water capacity and Pumps requirement in industries. | | - |
| | Water Power, Brake Power, WHP and Pump Efficiency | V | -, - |
| | and numerical calculations, | I II Heye I | |
| | Testing of pumps and pump maintenance. | | |
| | Total | 64 | 70 |

7. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit | Unit Title | Teaching | Distrib | oution o | f Theor | y Marks |
|------|------------------------------|----------|---------|----------|---------|---------|
| No. | | Hours | R | U | A | Total |
| | A | | Level | Level | Level | Marks |
| I | Basics of fire science | 10 | 05 | 05 | 00 | 10 |
| II | Combustion | 08 | 05 | 05 | 02 | 12 |
| III | Transmission of heat | 08 | 05 | 05 | 02 | 12 |
| IV | Products of flame | 10 | 05 | 05 | 02 | 12 |
| V | Different combustible matter | 14 | 06 | 06 | 00 | 12 |
| VI | Hydraulics | 14 | 03 | 03 | 06 | 12 |
| | Total | 64 | 29 | 29 | 12 | 70 |

Legends: R-Remember, U-Understand, A-Apply and above (Bloom's Revised taxonomy)

<u>Note</u>: The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may vary from above table.

8. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

List of Assignments

- Draw and explain fire triangle and tetrahedron with each elements.
- Draw and explain fire extinguishing methods.

- Explain the terms Limits of flammability, Flash point, fire point, explosions, Catalysts and inhibitors.
- Explain Fire load concept with formula, Calculate fire load for your class room area.
- Explain heat transfer elements and what the actual impacts on building fire?
- Explain the terms Auto-ignition temperature, thermal runaway, Spontaneous heating, and ignition due electric spark.
- Draw and explain flame, Non-luminous flames, Diffusion flame, premixed flame, Premixed flames, and explosions.
- Explain U.V.C.V. and B.L.E.V.E
- Explain the Ideal Gas Law, Vapour pressure & boiling point.
- Explain the properties of matters.
- The Newton's third law of motion and relation with jet reaction.
- Explain Water Hammer and its effects and control measures.

9. SUGGESTED LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |
|------------|---|--|--|
| 1 | Fire Technology Chemistry and Combustion | David M. Wharry and Ronald Hirst, | IFE, UK |
| 2 | Cases of Combustion, Flame & Explosion | B.lewis & G.Ven, Elbe, | Academic Press |
| 3 | National Fire Protection Association Volume-II | | Arkose Press |
| 4 | Basic Chemistry for Fire Engineers | William Kingsley | Hodgetts, 1947 |
| 5 | Handbook of Fire Technology | R. S. Gupta | Orient Longman |
| 6 | Fire Fighting the Essential Handbook, Volume- | Barendra Mohan Sen | UBS |
| 7 | Fire Service Manual Volume 1: Fire Service Technology, Equipment and Media - Physics and Chemistry for Firefighters | ् चल्ल | HM Fire Service Inspectorate Publications Section London: The Stationery Office |
| 8 | Fire Service Manuals Volume 1: Fire Service Technology, Equipment and Media - Hydraulics, Pumps and Water Supplies | Great Britain: H.M. Fire Service Inspectorate | The Stationery Office |
| 9 | Fundamentals of Physics | David Halliday, Robert Resnick, Jearl Walker | Wiley |
| 10 | The Chemistry of Combustion, | J. Newton Friend | Bibliolife Reproduction Series |
| 11 | Dynamics for Firefighters | Benjamin Walker | Pavilon Publishing |

FS

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

COURSE TITLE : FIRE SERVICE ORGANIZATION

COURSE CODE : 28019

1. RATIONALE

This subject will be appropriate for individuals working in the fire sector who hold roles requiring management and leadership skills and who need to appreciate the wider context of organisation's operations. The persons train in firefighting processes must also know about fire service organizations and their functioning. They must also know the duties and responsibilities of fire service people and also the procedures to be followed in the evet of a fire or disaster.

2. COMPETENCY

- Demonstrate knowledge and skills in the area of Basic Concepts and Techniques of Safety Management.
- To familiarize with different roles in fire safety organization.
- To understand the importance of Safety Education and Training needs of an Organization. To know the management functions.
- To learn different types of documentation handling by the fire service organization and importance.
- To know the different types of organizations and its functions.

3. COURSE OUTCOMES

At the end of this course student will be able to:

- Explain good practice in relation to leadership and management.
- Assess the role of leadership and management in delivering organization objectives.
- Assess the role of policy and procedures in delivering organization objectives.
- Explain the contribution of leaders and managers to health and safety.
- Understand the purpose of planning and performance management.
- Understand the contexts and constraints relevant to service delivery.

4. TEACHING AND EXAMINATION SCHEME

| | eachi chem | | Credit | | | | | | Exam | ination | Scheme | | | | | |

5. LIST OF PRACTICALS/ EXERCISES/ ASSIGNMENTS/ CASE STUDIES

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|---|
| 1 | Concept of Organization with structures. |
| 2 | The duties of station administration. |
| 3 | Fire service documentations and importance of record maintenance. |
| 4 | Importance Fire station discipline. |
| 5 | Describe different Fire Service Equipment. |
| 6 | Features of good organization structure. |
| 7 | Meaning of leadership and its good qualities. |
| 8 | Different leadership styles and most useful in fire safety. |
| 9 | Importance of Motivation and FIRE FIGHTING EQUIPMENTS in fire service organization. |
| 10 | The benefits of effective communication for the organization. |
| 11 | Communication and message at fire ground. |
| 12 | Importance of Training in Fire Service Organization. |
| 13 | Different Types of Ladders used in Fire Service Organization. |
| 14 | Role of the Fire Officer at various incidents. |

6. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to attain the identified competencies.

| Unit | Topic and Contents | Hours |
|------|---|-------|
| | FIRE SERVICE ORGANIZATION | |
| | Definition of organization. | |
| Ι | • Fire brigade purpose, scope and equipment's, Fundamentals of fire station management, | 08 |
| | Structure of city fire organization, | |

| Unit | Topic and Contents | Hour |
|------|--|------|
| | • Fire service organisation and its hierarchy, | |
| | • The role of fire service organization, | |
| | Role of State fire services, | |
| | Role of local and Municipal fire services, | |
| | Wings of fire service organization | |
| | FIRES SERVICE ADMINISTRATION | |
| | Fire Station administration, | |
| | Mandatory documents and operational records, Station discipline, | |
| | Features of good organization structure | |
| | FIRE SERVICE LEADERSHIP | |
| | Meaning of leadership, | |
| | Types of Leadership, | |
| | The differences between management and leadership, | |
| | • The importance of encouraging staff participation in decision making, | |
| | 0 100 01-1-10-10- | |
| II | | 08 |
| 111 | Useful leadership style in fire service For this was afleadership. | 00 |
| | • Functions of leadership, | |
| | Leadership styles may be applied to encourage, motivate and support | |
| | team members, | |
| | • Leadership Function of the Fire Officer (Fire Ground). | |
| | • The importance of planning, organizing and coordinating skills, and to | |
| | recognize achievement FIRE SERVICE DISCIPLINE, MOTIVATION & | |
| | , | |
| | COMMUNICATION Maying of dissipline | |
| | Meaning of discipline Olamonto interpretable and discipline | |
| | • Characteristics of good discipline | |
| | Need of motivation for fire & safety | |
| | Motivational Theory of experts. | |
| | An effective intrinsic motivation technique is job enrichment. | |
| III | Incentive schemes as motivation | 08 |
| -000 | Meaning of decision making | |

FS

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

COURSE TITLE : FIRE SAFETY

COURSE CODE : 28115

1. RATIONALE

This subject will be appropriate for individuals who provide fire safety advice and/or carry out fire safety assessments/audits in any of the following contexts: commercial office premises, retail premises, factories and other places of work, places of public entertainment including cinemas, theatres, dance halls and premises, alcohol licensed premises, hotels and other sleeping accommodation premises, health and other care-related premises, sports grounds, flats/high-rise residential buildings, safe storage of combustibles materials – prevention and control of fires large outdoor events, caravan and camping site safety, petrol filling stations, animal premises and stables.

It will be of interest to:

- Fire Safety/Protection Officers working in Fire and Rescue Services
- Fire Risk Assessors
- Fire/Safety Officers/Managers working in premises in the contexts listed above
- Individuals working in areas such as construction, building design and fire safety equipment design and manufacture.

2. COMPETENCY

- To learn about the
- Fundamentals of buildings and their classifications.
- Evacuation procedure and means of escape during emergency in tall structures.
- Automatic fire and gas detection in different types of occupancy.
- First aid firefighting equipment's, their working principles and periodic maintenance.
- Ideal fire and life safety requirement based on different types of buildings.

3. COURSE OUTCOMES

At the end of this course student will be able to:

- Explain fire resistance in relation to different buildings and building materials.
- Explain the operation of fire protection measures and equipment and assess the effectiveness of protection options in different situations.
- Explain and apply fire safety principles and practices in diverse contexts.
- Assess risks in different situations and identify appropriate action to improve safety.

8. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

List of Assignments

- Benefits and difference between Analogue and addressable alarm system.
- Importance of building construction with respect to fire.
- Emergency fire evacuation drills practice, frequency and benefits.
- On site and Off site emergency plan and importance in fire emergency.
- Draw flow diagram and explain Very Early Smoke Detection (VESDA).
- Draw and explain NOVEC suppression system.
- Draw and explain Water mist system.
- Draw flow diagram for Firefighting pump house, explain different firefighting pumps.
- Draw and explain lightening protection importance.
- Prepare fire order to control fire emergency.
- Draw and explain Hazchem Code.
- Explain MSDS elements and importance in hazardous chemicals transportation emergency.

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

: SPECIAL FIRE HAZARDS **COURSE TITLE**

COURSE CODE : 28020

1. RATIONALE

This subject is helpful to control special types of fire. Recently new types of industries have come up such as petrochemical, atomic, gas stations etc. In summer season fires due to dust and dry wood occur. These are special types of fires. There are also incidences of gas/petrol leakage causing fire and accidents. The study of this subject will enable the students to acquire relevant knowledge.

2. COMPETENCY

- Identify various special hazards in various industries.
- To select preventive and protection measures on special hazards.
- To list out various firefighting equipment's on special hazards.
- To observe nature & behavior of special hazards.
- To find the cause of fire in special hazards.

COURSE OUTCOMES

At the end of this course student will be able to:

- Identify the hazards and risk analysis of the special types of industries.
- Identify hazards, preventive and protection measures for the special types of manufacturing units.
- Design fire alarm system with fire and gas detection instruments.
- Demonstrate first aid firefighting appliances and performed periodic care and maintenance for the same.

4. TEACHING AND EXAMINATION SCHEME

5. LIST OF PRACTICALS/ EXERCISES/ ASSIGNMENTS/ CASE STUDIES

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|---|
| 1 | Storage, packing and transportation precaution of explosives. |
| 2 | General hazards, prevention and protection measure in Residential high rise buildings. |
| 3 - | General hazards, prevention, and protection measures in Public Assembly & Hospital buildings. |
| 4 | Describe various Airport Emergencies and role of different emergency response teams. |
| - 5 | Fueling and Defueling – Its hazards, prevention, and protection measures at airports. |
| 6 | Impacts of Forest Fires on Environment. |
| 7 | Refrigeration/cold storage Plants design, hazards, and fire protection. |
| 8 | Hazards, preventive, and protection measures in marine safety. |
| 9 | Alfa, Beta, and Gamma radiations, its hazards and preventive, as well as protection measures. |
| 10 | Dust Explosion, its hazards and preventive/mitigation measures. |

6. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to attain the identified competencies.

| Unit | Topic and Contents | Hours |
|------|--|-------|
| | EXPLOSIVES | |
| | • The Explosive Act,1884 of India | |
| | • Types of explosives, | |
| | • Uses of explosives in industries, | |
| | • General classification of explosives as per Act, Examples of Low | |
| | Explosives & High Explosives, Packing and storage of explosives, | |
| - | • Transportation of explosives, | |
| 1 | • Fire Preventive & protection measures for explosives. | 08 |
| | Dust: | |
| | Dust explosion Pentagon | |
| | Factors Influencing Dust Explosions. | |
| | Causes of dust explosion and safety precautions. | |
| | Nature and behaviour of dust & hazards. | |
| | Preventive methods for dust explosion. | |
| II | FIRE RISK AT BUILDINGS | 10 |
| | Led real | 10 |

| Unit | Topic and Contents | Hour | | | | | | | |
|------|---|------|--|--|--|--|--|--|--|
| | Meaning of low, high rise and super high rise buildings as per the NBC | | | | | | | | |
| | and DCPR 2034. | | | | | | | | |
| | Causes of fire and safety precautions measures in following buildings: | | | | | | | | |
| | Under Construction buildings. | | | | | | | | |

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

COURSE TITLE : FIRE INVESTIGATION

COURSE CODE : 28034

1. RATIONALE

This subject focuses on the understanding and technical knowledge required by those who investigate the cause of fire. It is intended for Watch and Crew Managers in the Fire and Rescue Service in charge of operational fire appliances and also for fire safety specialists. The qualification covers the scientific principles that underpin the dynamics of fire as well as the process of investigation for smaller fire/explosion scenes. It provides a basis for progression to Fire Investigation specialist roles.

2. COMPETENCY

- To understand the basic principle of fire investigation.
- To the purpose of fire investigation.
- To understand the process of investigation.
- To understand the practical lifesaving first aid methods.
- Introduction to Fire Forensic Science, Terminologies, Fire and Arson investigation etc.
- Understanding Fire Development, Factors Affecting Fire Growth, Compartment Fires, fire Spread, Human behaviour in fire.

3. COURSE OUTCOMES

At the end of this course student will be able to:

- Apply fire science principles in carrying out fire investigations at straightforward fire scenes and arrive at a conclusion
- Explain the preparations and procedures to investigate an incident involving fire and/or explosion
- Explain and apply the principles that underpin the collation and analysis of evidence
- Analyses information to produce conclusions based on evidence and relevant fire science
- Prepare a more complex scene for handover to a specialist investigator understand and Apply the protocols for working safely at a fire scene and with associated evidence.

4. TEACHING AND EXAMINATION SCHEME

| | eachi chem | | Credit | Examination Scheme | | | | | | | | | | | | |
|---|---------------|---|---------|--------------------|--------|-------|-----|-----|-------|-----|-----------|-----|-----|-----|-------|-----|
| | | | | | Theory | | | | | | Practical | | | | | |
| L | Т | P | (L+T+P) | P) Paper | ESE | | PA | | Total | | ESE | | PA | | Total | |

5. LIST OF PRACTICALS/ EXERCISES/ ASSIGNMENTS/ CASE STUDIES

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|---|
| 1 | Importance and different processes of fire investigation. |
| 2 | Prepare a detail Investigation report on Arson Fire. |
| 3 | Importance of preservation of burnt materials for forensic lab. |
| 4 | Describe Primary & Secondary fire damage. |
| 5 | Describe different salvage equipment and its importance. |
| 6 | Importance of first aid during an Emergency. |
| 7 | Describe usage and importance of advanced automatic defibrillator. |
| 8 | Prepare a detail Investigation report on Fire occurred at Kumbakonam School, Tamilnadu. |
| 9 | Prepare a detail Investigation report on Fire occurred at Kamala Mill, Mumbai on Dec.2017. |
| 10 | Prepare a detail Investigation report on Fire occurred at Sunrise Hospital of Dreams Mall, Bhandup, Mumbai. |

6. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to attain the identified competencies.

| Unit | Topic and Contents | Hours |
|------|--|-------|
| I | FIRE INVESTIGATION The importance fire investigation, Frequent causes of fire: Sources of ignition, Establishing the known and unknown causes, Organizations involved in fire investigations, Education and training of fire investigation personnel | 10 |
| II | DETECTION OF ARSON FIRE Meaning of Arson, Detection of Arson, The reasons for suspecting arson, Motives of Arson, | 10 |

| Unit | Topic and Contents | Hour | | | | | | | |
|--------------|---|------|--|--|--|--|--|--|--|
| | Indicators of Arson, | | | | | | | | |
| | Action by the Fire Brigade. | | | | | | | | |
| | THE PROCESS OF INVESTIGATION- I | | | | | | | | |
| | • Initial action, | | | | | | | | |
| | Conducting the investigation. | | | | | | | | |
| | The reconstruction and failure analysis process, Examinations of the | | | | | | | | |
| Ш | scene, | 12 | | | | | | | |
| | Collection of background data, | 14 | | | | | | | |
| | • Testing, | | | | | | | | |
| | Reconstruction and analysis, | | | | | | | | |
| | Failure analysis | | | | | | | | |
| | THE PROCESS OF INVESTIGATION- II | | | | | | | | |
| | • The interviewing of witnesses and others: | | | | | | | | |
| | General, The attitude of those questioned, Methods of questioning, Information | | | | | | | | |
| IV | required. | | | | | | | | |
| I Y | • Investigation on site: | 12 | | | | | | | |
| | Temperature reached, Establishing the point of ignition, time if ignition, | | | | | | | | |
| | • The sources of ignition. | | | | | | | | |
| | Identifying burnt material by forensic lab. | | | | | | | | |
| | SALVAGE CONTROL | | | | | | | | |
| | Meaning of salvage, | | | | | | | | |
| \mathbf{V} | Primary & Secondary fire damage, | 10 | | | | | | | |
| | Tactical Consideration-Forcible entry, | 10 | | | | | | | |
| | Ventilation, Application of water, | | | | | | | | |
| | Dewatering etc., Salvage equipment. | | | | | | | | |
| | FIRST AID | | | | | | | | |
| | • Meaning of first aid, General rules for first aid, Priority of Treatment by a first aider. | | | | | | | | |
| | | | | | | | | | |
| | Dressing & Bandaging, Wound injury and first aid, Injury related to bleeding and first aid, | | | | | | | | |
| | • Shock. | | | | | | | | |
| | Fracture (Injuries of bones), Injuries to muscles and joints | | | | | | | | |
| | Unconsciousness | | | | | | | | |
| VI | Burns and Scalds, Degree of burns, Different type's burns | 10 | | | | | | | |
| | Snakebite, Heat stroke, Poisoning, Contents of First Aid Box. | | | | | | | | |
| | Triage and mass causality. | | | | | | | | |
| | Manual and automatic Resuscitation – Principles of resuscitation, Mouth to | | | | | | | | |
| | mouth, Schafer's Method, Sylvester's Method, Holger-Nielson Method, | | | | | | | | |
| | External chest compression, CPR- Cardio Pulmonary Resuscitation, | | | | | | | | |
| | Rescue techniques by fire brigade and rescue team- Rescue with one | | | | | | | | |
| | rescuer, Rescue with More than two rescuers, | | | | | | | | |
| | Total | 64 | | | | | | | |

7 SUGGESTED LEARNING RESOURCES

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : FIRST

COURSE TITLE : FIRE FIGHTING DRILLS

COURSE CODE : 28022

1. RATIONALE

Firefighting drills is a core practical subject which gives practice to use various firefighting equipment and accessories which is useful in job. The hands-on drills through this practical will help to handle the live situations effectively and efficiently.

2. COMPETENCY

To learn about

- How to perform evacuation drill.
- Fire extinguisher drill.
- Different instruction of firefighting appliance drill.
- Lifting, carrying, rolling and unrolling of firefighting hose.
- Three men and four men hydrant drill.
- Application and different ladder drill.
- How to identify the errors in various firefighting drill.

To Understand the

- Breathing apparatus and how to use in case of emergency.
- Foam and foam making branches, their uses in case of emergency.

3. COURSE OUTCOMES

At the end of this course student will be able to:

- Demonstrate different world of command used in appliance drill.
- Apply hose drill performance and practice in firefighting operation.
- Apply hydrant drill performance and practice in firefighting operation.
- Apply trailer pump drill performance and practice in firefighting operation.
- Apply ladder drill performance and practice in firefighting operation.

4. TEACHING AND EXAMINATION SCHEME

| | eachi chem | | Credit | | Examination Scheme | | | | | | | | | | | |

(*): Under the theory PA, 30 marks is the average of 2 class tests of the marks each to be taken during the semester for the assessment.

(#\$) or (@\$): Under the practical ESE - 50 Marks (100%)

1) 30 Marks (60%) - For Practical – ESE

2) 20 Marks (40%) - Average of 2 Skill tests / Practicals of 30 marks each is to be conducted during the semester, and then should be converted to 20 marks.

Note: If student Remaining absent in PR-ESE shall be considered as ABSENT in PR-ESE

Legends: L-Lecture, T – Tutorial/Teacher Guided Theory Practice, P – Practical, ESE - End Semester Examination, PA - Progressive Assessment

@Internal Assessment, #External Assessment, *#Online Examination

5. LIST OF PRACTICALS/ EXERCISES/ ASSIGNMENTS/ CASE STUDIES

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|---|
| 1 | Squad drill and basic discipline which need to maintain in fire services. |
| 2 | Various type of salute and their significance. |
| 3 | Use of tackles and pulleys during firefighting and vertical rescue operations. |
| 4 | To understand purpose of evacuation drill and how should conduct the same. What is role of each member and their deployment at particular locations, head count and other relevant information about evacuation drill? |
| 5 | How to preform Fire extinguisher drill, Basics of fire, Classification of fires, Types of extinguishers, Fire extinguishing methods, Operating principle of extinguishers, firefighting on fire, require checklist and how to fill the same. |
| 6 | Practical demonstration about how to conduct fire hydrant drill for 3 man. Hose Drill Actions: Lifting hose, lowering hose, carrying hose, laying hose, connecting hose, disconnecting hose, under running, Remove the kink, Rolling. Identification of different types of hose fittings and their uses. |
| 7 | Practical demonstration about how to conduct fire hydrant drill for 4 man. Hose Drill Actions: Lifting hose, lowering hose, carrying hose, laying hose, connecting hose, disconnecting hose, under running, Remove the kink, Rolling. Identification of different types of hose fittings and their uses. |
| 8 | Understand the types of breathing apparatus set and time calculations as per actual air availability inside Cylinder. BACO role and its responsibility. |
| 9 | Practical demonstration of Breathing apparatus set, breathing apparatus different parts and its working, different types of wearing of BA set. |
| 10 | To Carry Out Four Men Ladder Drill, Formation of crew, individual working procedure on get to work command, ladder pitching, climbing, rescue operation, firefighting, ventilation procedure, ladder carrying, drill report. |
| 11 | Demonstration of fire Tender Drill 6 -man Water Tender Drill: Mounting procedure dismounting procedure, Individual working procedure like -working with ladder Application of different types of signals applied during pump operation, working with B.A. set, Soft suction, Hard suction. |
| 12 | Demonstration of trailer pump operation and how to use suction hose while taking water from well or river. |
| 13 | Foam, Foam Making branches and information about form making solutions. |
| 14 | Four man portable Fire pump drill and practical demonstration. |
| 15 | To understand and practical demonstration about how to make knots like Bow line Running Bow line, bow line on the bight, Chair Knot Self Rescue Knots: Slipper Hitch & Draw Hitch, Other Knots, loop, bends, hitch: loop, half hitch, thumb knot figure of eight, Clove hitch, rolling hitch, round turn two half hitch, fisherman' hitch, fisherman's knot, waterman's hitch, timber hitch, cat's pay, sheep shank |

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study | | | | | |
|------------|--|--|--|--|--|--|
| | single sheet bend, double sheet bend, reef knot, midshipman hitch, Construction, | | | | | |
| | and application. | | | | | |
| 16 | Four man foam drill and how to use foam making branches. | | | | | |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| Sr. No. | Equipment Name with Broad Specifications Water capacity 10000 lit, 100 mm Hydrant line, Hydrant post, Pump 7.5 hp x 180 lpm, Butterfly valve, Starter, NRV, PRV, Pressure gauge, Pressure switch. | | | | | |
|------------|---|--|--|--|--|--|
| 1 | | | | | | |
| 2 | Hydrant post with accessories, Hose pipes 15m x 2 no's, Hose box, Hammer, Uncontrolled branch 1 no, Hose reel, Fire service inlet (Two way), Dividing Breeching, Collecting breeching, | | | | | |
| 3 | Sprinkler module with branches, Down word, upward, side wall nozzles. Detection system- Smoke, Heat detectors (2 Nos each), Conventional panel, MCP, Audio visual display Hooter, Different auto glow signages, evacuation plan. Samples of jackets. PPE's | | | | | |
| 4 | Extinguishers Water, Foam, 9 lit, DCP 4 kg, (Stored pressure & Cartridge type each), Sand bucket, Co ₂ Extinguisher 4.5 kg, MS Tray, Fuel. | | | | | |
| 5 | Extension Ladder | | | | | |
| 6 | Rope | | | | | |
| 7 | Breathing Apparatus Set (Carbon Fiber), Different types of masks, gloves, ear plugs, ear muffs, chemical cartridge mask, Harness, belts | | | | | |
| 8 | Fireman Axe, Ceiling Hook, Drag Hook, Fire Beater, Door Breaker, Steel shod lever, Pad Lock Remover, Persuader, Spreader, Cutter, Bending Bar, Quick Release Knife, Shears, Bolt cutter, Search light, Focusing light. Study of hydraulically operated small gears and their use in Rescue | | | | | |
| 9 | First Aid Box, AMBU bag, Stretcher | | | | | |
| 10 | Manikin for CPR | | | | | |
| 11 | Different foam making branches. Water monitor. | | | | | |

7. SUGGESTED LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |
|------------|---|-----------------|-----------------------|
| 1 | Drill Manual for Fire Services | Govt. Of India. | |

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : SECOND

COURSE TITLE : FIRE AND ELECTRICAL AUDITS

COURSE CODE : 28209

1. RATIONALE

This subject will give knowledge to prepare competent professionals to undertake Fire and Life Safety Audit. Through training and capacity development of personnel in collaboration with other stakeholders, this course aims to provide a standard procedure and Format in India for Auditors to conduct Fire & Life Safety Audit

In current scenario fire rate ratio is in resining day by day so to control the rate of fire accidents and emergencies audit knowledge is very much essential.

Subject will be able to,

- Acquire Practical learning through industrial visits, assignments and research industrial reports/projects.
- Apply in-depth knowledge in their core elective area of specialization like Fire Risk Assessment and Management, Risk Mitigation, Various National and International Acts, Codes and Standards, Techniques of Electrical, Fire and life safety audits etc., to be able to solve the complex challenges of Audits.
- Understand and develop core competence in conducting audits related to Fire and Life Safety and preparation of reports.

2. COMPETENCY

- The objectives of Electrical, and Life Safety Audit are,
- To understand basics of fire chemistry, behaviour of fire and its effects on structural elements.
- To understand philosophy of effective fire prevention and protection design.
- To understand the Acts, Rules, with respect to the electrical, fire and life safety.
- To study and compare different National and International legal requirements with respect to fire and life safety.
- To understand the concepts of industrial fire safety risk assessment and management concepts of risk reduction.
- To understand the concept of performance based design and its role in fire and life safety management and audits.
- To understand the basics of electrical, fir and life safety audits.
- To develop competence in subject of Electrical, fire and life safety audit.

FS

3. COURSE OUTCOMES

At the end of this course student will be able to apply knowledge to conduct:

- The separate electrical audits in residential and industrial buildings.
- The separate Fire audits in residential and industrial buildings.
- Inspections in industries.
- Risk assessment.

4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme | | Credit | | | | | Examination Scheme | | | | | | | | | | | |

| VI | Auditing Systems And Reports | 08 | 03 | 03 | 06 | 12 | | |
| | Total | 64 | 29 | 25 | 16 | 70 | | |

Legends: R-Remember, U-Understand, A-Apply and above (Bloom's Revised taxonomy)

<u>Note</u>: The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may vary from above table.

9. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

- 1. Provisions of the Maharashtra Fire Prevention and Life Safety Measure Act, 2006
- 2. Provisions of the Indian Electricity Act, 2003
- 3. Provisions of the National Building Code, 2016 Part-IV
- 4. Importune of Indian Standards and guidelines to conduct in Electrical and Fire Audits.
- 5. Draw and explain Importance of lightening arrestor and static electricity
- 6. Importance of annual testing's and measurements in electrical and fire safety audits.
- 7. Draw and explain importance of earth pits.
- 8. Importance of electrical and fire risk assessment.
- 9. Data collection for the electrical and fire risk assessment and audits.
- 10. Visit to any of the residential building and conduct electrical and fire audit with report.
- 11. Prepare own presentation and perform in your class. (Time: 8-10 min)
- 12. Scientific methodology for the Electrical and Fire Audits.

10. SUGGESTED LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : SECOND

COURSE TITLE : FIRE FIGHTING EQUIPMENT & RESCUE TECHNIQUES

COURSE CODE : 28070

1. RATIONALE

Firefighting Equipment & Rescue Techniques is a core practical subject which gives practice to use various firefighting equipment and accessories which is useful in job. Rescue of people caught in fire or in disaster is very important. The hands-on practice through this practical will help to handle the live situations effectively and efficiently.

2. COMPETENCY

The students will be able to:

- To give basic concepts of Rescue in Ordinary as well as special situations in Major Disasters.
- To Understand the Respiratory and Non-Respiratory Personal Protective Equipment's used by Rescuer in Emergencies.
- To learn about fire service equipment.
- To give basic training about special hydraulic rescue appliances and understand where they need to be used.
- To give basic training about special battery-operated rescue appliances and understand where they need to be used.
- To learn about evacuation chair operation and how to use in staircase.
- To understand how to operate manually operated rescue equipment.
- To understand the search and rescue operation and its techniques.
- To give basic training about pneumatic rescue tools and its uses.

3. COURSE OUTCOMES

The students may able to,

- Demonstrate Rescue Operations by means of Special and unusual type.
- Apply the proper use of Respiratory and Non-Respiratory Personal Protective equipment's in emergencies.
- Apply different types of fire service equipment.
- Demonstrate Rescue tools of hydraulic and battery operated.
- Demonstrate pneumatic rescue tools and it uses.
- Search and rescue operation in case of special conditions.
- Evacuation chair and it operation while using at staircases

4. TEACHING AND EXAMINATION SCHEME

| | eachi chem | | Credit | | Examination Scheme | | | | | | | | | | | | | | |
|----|---------------|---|---------|------------|--------------------|----------|-----------|-------|-----|-----|------|-------|-----|-----|-----|-----|-----|-----|-----|
| | L T P | | (L+T+P) | Theory Pro | | | | | | | Prac | tical | | | | | | | |
| L | | P | | (L+T+P) | P (L+T+P) | (L+T+P) | P (L+T+P) | Paper | ES | SE | P | A | То | tal | ES | E | P | A | Tot |
| | | | | | , | | | Hrs. | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min | Max |

^{(*):} Under the theory PA, 30 marks is the average of 2 class tests of 30 marks each to be taken during the semester for the assessment.

(#\$) or (@\$): Under the practical ESE - 50 Marks (100%)

1) 30 Marks (60%) - For Practical – ESE

2) 20 Marks (40%) - Average of 2 Skill tests / Practicals of 30 marks each is to be conducted during the semester, and then should be converted to 20 marks.

Note: If student Remaining absent in PR-ESE shall be considered as ABSENT in PR-ESE

Legends: L-Lecture, T – Tutorial/Teacher Guided Theory Practice, P –Practical, ESE -End Semester Examination, $P\Lambda$ - Progressive Assessment

@Internal Assessment, #External Assessment, *#Online Examination

5. LIST OF PRACTICALS/ EXERCISES/ ASSIGNMENTS/ CASE STUDIES

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|--|
| 1 | To understand and practical demonstration about how to make knots like Bow line, Running Bow line, bow line on the bight, Chair Knot Self Rescue Knots: Slippery Hitch & Draw Hitch, Other Knots, loop, bends, hitch: loop, half hitch, thumb knot, figure of eight, Clove hitch, rolling hitch, round turn two half hitch, fisherman's hitch, fisherman's knot, waterman's hitch, timber hitch, cat's paw, sheep shank, single sheet bend, double sheet bend, reef knot, midshipman hitch, Construction, and application. |
| 2 | Understand the types of breathing apparatus set and time calculations as per actual air availability inside Cylinder. BACO role and its responsibility. |
| 3 | Practical demonstration of Breathing apparatus set, breathing apparatus different parts and its working, different types of wearing of BA set. |
| 4 | Fire service hose fittings and branches inlet and its uses, dividing breaching, collecting breaching. |
| 5 | Bandages and their respective uses in case of medical emergency happened, also live demonstration about bandages. |
| 6 | Demonstration of different type of manual fireman lifting techniques and various manual rescue techniques. |
| 7 | Foam, Foam Making branches and information about form making solutions |
| 8 | Understand the how hydrant will be operate and what relevant requirements can be sue while operating hydrants. |
| 9 | Brief information about hydraulic rescue appliance, connection and dismantling of hydraulic hoses, equipment. |
| 10 | Brief, purpose, operating procedure, demonstration of battery-operated tools. |
| 11 | Demonstration of Evacuation chair operation and how to use in case of emergency. How to handle evacuation chair at staircase. |
| 12 | Brief, purpose, operating procedure of special manually operated rescue equipment's. |

| Sr. No. | Name of Practical/ Exercise/ Assignment/ Case Study |
|------------|--|
| 1.2 | Importance, purpose to know about search and rescue operation and how to conduct |
| 13 | the same in case of emergency. |
| | Brief information about how to use pneumatic rescue tools in case of emergency |
| 14 | situation. |
| 1.5 | Demonstration of life saving techniques, CPR, Sylvester method, holger nielsen |
| 15 | method schafer method. |
| 1.6 | Fire lift operation in case of elevator mantrap and handling of fire lift during |
| 16 | emergency situation. |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| Sr. No. | Equipment Name with Broad Specifications |
|------------|--|
| 1 | Water capacity 10000 lit, 100 mm Hydrant line, Hydrant post, Pump 7.5 hp x 180 lpm, Butterfly valve, Starter, NRV, PRV, Pressure gauge, Pressure switch. |
| 2 | Hydrant post with accessories, Hose pipes 15m x 2 no's, Hose box, Hammer, Uncontrolled branch 1 no, Hose reel, Fire service inlet (Two way), Dividing Breeching, Collecting breeching, |
| 3 | Sprinkler module with branches, Down word, upward, side wall nozzles. Detection system- Smoke, Heat detectors (2 Nos each), Conventional panel, MCP, Audio visual display Hooter, Different auto glow signages, evacuation plan. Samples of jackets. PPE's |
| 4 | Extinguishers Water, Foam, 9 lit, DCP 4 kg, (Stored pressure & Cartridge type each), Sand bucket, Co ₂ Extinguisher 4.5 kg, MS Tray, Fuel. |
| 5 | Extension Ladder |
| 6 | Rope |
| 7 | Breathing Apparatus Set (Carbon Fiber), Different types of masks, gloves, ear plugs, ear muffs, chemical cartridge mask, Harness, belts, |
| 8 | Fireman Axe, Ceiling Hook, Drag Hook, Fire Beater, Door Breaker, Steel shod lever, Pad Lock Remover, Persuader, Spreader, Cutter, Bending Bar, Quick Release Knife Shears, Bolt cutter, Search light, Focusing light. Study of hydraulically operated small gears and their use in Rescue |
| 9 | First Aid Box, AMBU bag, Stretcher |
| 10 | Manikin for CPR |
| 11 | Different foam making branches. Water monitor. |

7. SUGGESTED LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication | | |
|------------|--|--------------------------------------|-----------------------------------|--|--|
| 1 | Anindita Basak | Environmental Studies | Pearson | | |
| 2 | J.N.B. Bell | Air Pollution and Plant Life | John Wiley and Sons, New Delhi | | |
| 3 | Christon J. Hurst, Ronald L. Crawford, Guy R. Knudsen, | Manual of Environmental Microbiology | 2nd edition, ASM | | |

| Sr. No. | Title of Book | Author | Publication |

: ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING PROGRAMME NAME

PROGRAMME CODE

: SECOND **SEMESTER**

: PROJECT **COURSE TITLE**

: 28085 **COURSE CODE**

1. RATIONALE

- Demonstrate the personal abilities and skills required to produce and present an extended piece of work
- Engage in personal inquiry, action and reflection on specific topics and issues
- Focus on, and demonstrate an understanding of, the areas of interaction
- Reflect on learning and share knowledge, views and opinions.

2. COMPETENCY

Students will be able to

- Plan the activities related to safety.
- Collect Information/Resources.
- select and Apply relevant Techniques.
- Analyse the Information.
- Organize the Written Work.
- Analyze the Process and Outcome.

COURSE OUTCOMES

- Creating an excellent product/outcome in response to the goal, global context and criteria
- Demonstrate excellent research skills
- Demonstrate excellent communication and social skills.

TEACHING AND EXAMINATION SCHEME

| | achi | | | | | | | | | | Credit Examination Scheme | | | | | | | | |
|---|------|---|-------------|---------------|-----|-----|-----|---------|-----|-----|---------------------------|-----|-----|-------|-----|-----|--|--|--|

5. IMPLEMENTATION STRATEGY

Candidate should be assigned Project preferably individually or if at all not possible can form a group of maximum 3 members. Every candidate must maintain the weekly progress diary and the guide should review the progress and sign the diary regularly.

Every candidate has to submit **Synopsis Report** (of pages not more than 10) and deliver Two Presentations for the completion of the Project.

First Presentation of Synopsis - to the Internal Guide tentatively during Third Week of the Academic Term.

Second Presentation on complete Project - to be given to the Internal Guide during Second Class Test schedule.

Contents of the Synopsis - It should include the following points

- 1. Cover Page of the Synopsis (Title of the Project, Student and Guide Details, Institute Name, Academic Year, Maharashtra State Board of Technical Education, Mumbai)
- 2. Index
- 3. Introduction
- 4. Need of the Project and Objectives
- 5. Problem Definition
- 6. Methodology
- 7. Action Plan

Evaluation of Practical-PA will be the average of two presentations, synopsis report and weekly progress diary maintained by the candidate.

There should not be any sort of typographical, diagrammatic and any other mistake/s in the final bound copy of the project report submitted by the candidate.

PROJECT REPORT CONTENTS

The Project report should essentially consists of the following details.

- COVER PAGE OF THE PROJECT
- CERTIFICATE FROM THE INSTITUTE
- ACKNOWLEDGEMENT
- TABLE OF CONTENTS
- ABSTRACT
- INTRODUCTION
- METHODOLOGY OF PROJECT
- RESULTS
- CONCLUSION AND FUTURE SCOPE

- ABOUT THE ORGANISATION / COMPANY (IN CASE OF INDUSTRY BASED PROJECTS)
- REFERENCES / BIBLIOGRAPHY

GUIDELINES FOR PREPARING THE PROJECT REPORT

Project work is a basic requirement for the award of Advanced Diploma. Project should be prepared based on any one of the subjects of the Programme.

Suggested Topics (Any One)

- Lighting installation used in any Industry (LPG Bottling plant / Steel plant / Explosive plant / Chemical or petro-chemical plant / Engineering plant / Refinery / Textile Industry etc.)
- Project work on installation, servicing and maintenance of portable fire extinguisher installed in industry/buildings/malls.
- Project work on any city fire brigade service.
- Project work on Fire Safety for storage of Hazardous goods in Industry.
- Project work on fire prevention and protection procedures adopted in an industry for handling, storage and processing of hazardous chemicals.
- Project work on "On Site Emergency Plan of a Steel Industry".
- Project work on study of fire hazards associated in industrial process / activities and safety precautions taken for these hazards.
- Project work on "On Site Emergency Plan of a Chemical / Explosive / Steel Industry".
- Project work on "Disaster Management Plan of an Industry".
- Project work on Documentation and Fire and Electrical safety Audits with 10 numbers of case studies.
- Project work on Pharmaceutical Industry.
- Project work on Construction Industry.
- Project work on Chemical, Petrochemical and Refinery Industry.
- Project work on Radiation Industry.
- Project work on Fire Works and Explosive manufacturing Industry.
- Project work on Dock and Marine Industry.
- Project work on in Automobile Industry.
- Project work on Electronics and IT Industry.
- Project work on case studies of Fire Investigations.
- Project work on Advanced fire Prevention, Protection Systems and Development.

The project work should be comprehensive and cover all fire aspects including environmental impacts.

COVER PAGE OF THE PROJECT

The Cover Page of the Project Report must include Title of the Project, Student and Guide Details, Institute Name, Academic Year, Maharashtra State Board of Technical Education, Mumbai.

CERTIFICATE FROM THE INSTITUTE

Certification from Project Guide, HOD, Principal and final signature of External Examiner during final examination.

ACKNOWLEDGEMENT

It should appear on the third page and the report writer should acknowledge the guidance provided by the project guide. Here the author may also acknowledge other persons who might have rendered help or supplied the required data or information for completion of the project. It should be brief and crisp. Generally, one page should suffice for acknowledgement.

TABLE OF CONTENTS

It must consist column heading as Chapter No., Name of the Chapter and Page Number.

ABSTRACT

Abstract should describe the entire project work with its aim, objectives and methodology and conclusion. The abstract should be limited to one or two pages.

INTRODUCTION

Give brief description of need, significance and applications of the Project. It is recommended to limit the description to about 2 to 5 pages.

METHODOLOGY OF PROJECT

This is the most important part of the project report and forms the main body of the project report. It needs very comprehensive coverage of all aspects of safety in the plant, industrial hygiene, environmental conservation, safety in storage and transportation, etc. It will usually require about 60 to 100 pages. However, do not try to increase the number of pages by giving unnecessary or irrelevant details or too much of theory. Write-up should include the following points:

- SHE policy of the company and its implementation.
- Fire policies.
- Provisional fire NOC
- Final fire NOC
- Form B certifications
- Building OC certificate.
- Building structural audit reports.
- Fire and electrical audit reports.
- CAPA
- Electrical annual testing reports.

- Fire pumps testing reports, Quarterly, half yearly, yearly equipment's servicing reports.
- Diesel, Petrol, Kerosene PESO licenses.
- LPG, PNG, Hazardous chemicals licenses.
- Canteen licenses, Local authority permissions,
- Approved plant layouts, fire hydrant, sprinklers, detection, VESDA drawings.
- Mutual aid agreements.
- Fire safety equipment's and list summery.
- Fire orders and procedures.
- Emergency contact list.
- Fire brigade communication procedure.
- Emergency evacuation floor layouts.
- Fire safety organisation
- Role of management in promoting fire safety and striving for continual improvement
- Accident and near-miss incidents reporting system.
- Accident and near-miss incident investigation system.
- Accident analysis (using data of previous five years at least)
- Case-studies (discuss at least five cases of different types of accidents/near-misses)
- Selection and training of employees.
- Safety induction and fire safety training of employees and contractor personnel.
- Health and hygiene (including pre-employment and periodic medical examinations).
- Environmental conservation.
- Fire Safety in transportation and training of drivers.
- Trade union and its role in promoting fire safety.
- Plant layout
- Facilities and services.
- Storage and handling of chemicals.
- Building management system and integration with the systems.
- Instrumentation for fire safety of plant and personnel
- Fire prevention and fire-fighting measures
- Housekeeping (GHK)
- Personal protective equipment (PPE)
- Pollution control measures
- Various safety procedures (e.g., work permit system, etc.)
- Fire risk assessments.

- Electrical and mechanical preventive maintenance
- Fire service equipment's maintenance.
- Fire Safe operating procedures (SOPs) and operating manuals
- Safety manual, material safety data sheets (MSDS), Trem cards, etc.
- Internal fire safety checklists and inspections.

Various data presented in the form of tables and graphs (e.g., graphs for injury frequency rates, severity rates, frequency-severity indices, incident rates, investigation, fire statistics, etc.), work permit form, accident/near-miss incident report form, medical attention form, block diagrams, plant layout, relevant photographs, MSDS, etc., which are required to supplement your project report, should be included at the end as annexures with appropriate references in the main text of the project report. If an annexure is of more than one page, it should be provided with page numbering. Page numbering should be done individually for each annexure.

RESULTS

It should contain experimentation result of the Project.

CONCLUSION AND FUTURE SCOPE

Based on the project work, draw inferences and mention future scope. The future scope should be specific, relevant and practically implementable.

ABOUT THE ORGANISATION / COMPANY (IN CASE OF INDUSTRY BASED PROJECTS)

Should mention Organizational Structure, Product / Services (Limit to one or two pages)

REFERENCES / BIBLIOGRAPHY

Mention books, research papers, websites referred in the report in this section.

PROJECT REPORT FORMAT

Paper Size - A4

Printing - Only on one side of the sheet

Line Spacing of Paragraph - 1 ½

Font Face - Times New Roman

FontSize - 12 for Normal text, 14 for Sub-headings and 16 for Headings

No of Project Report copies - Two

Binding - Hard bound copies with Black cover (Golden Embossing)

FS

PROGRAMME NAME : ADVANCED DIPLOMA IN FIRE SAFETY ENGINEERING

PROGRAMME CODE : FS

SEMESTER : SECOND

COURSE TITLE : FIRE TRAINING

COURSE CODE : 28086

1. RATIONALE

Fire Training course is introduced to Advanced Diploma in Fire Safety Engineering programme with the aim to imbibe the Fire industry culture and professional practices in the students before they enter into world of work. By exposing and interacting with the real-life Fire industrial setting, student will appreciate and understand the actual working of Fire industry, best practices adopted in Fire industry and other requirements in the Fire industry of training. The Fire industrial needs such as the Fire and Life Safety Management skill, Life skills and hands-on practices are intended to be inculcated in the students through this training. This short association with the Fire industry will be instrumental in orienting the students in transforming them to be Fire industry ready after completion of this diploma program.

2. COMPETENCY

This course is intended to develop the following competencies:

- Fire Safety Management Skills i.e. Firefighting, Fire prevention and Protection, Fire Risk assessment, Fire Audit, i.e. Communication, Presentation and others.
- Life Skills i.e. Time management, Safety, Innovation, Entrepreneurship, Team building and others
- Hands-on Practices i.e. Fire station, administration, Parade, drills discipline, Fire
 equipment maintenance and on site Incident response management and Emergency
 preparedness Assurance aspects.

3. COURSE OUTCOMES

The Fire training is intended to acquire the competencies as mentioned above to supplement those attained through several courses up to fourth semester of the program:

- Communicate effectively (verbal as well as written) to execute the work.
- Prepare the Fire industry report of the executed work.
- Exercise time management and Fire safety in the work environment.
- Work in Crews for successful completion of task and fire and other disaster mitigation processes.
- Work on case studies/live Incidents.

4. TEACHING AND EXAMINATION SCHEME

| | eachi chen | - | Credit | | Examination Scheme | | | | | | | | | | | - | | |

(*): Under the theory PA, 30 marks is the average of 2 class tests of 30 marks each to be taken during the semester for the assessment.

(#\$) or (@\$) : Under the practical ESE - 50 Marks (100%)

1) 30 Marks (60%) - For Practical – ESE

2) 20 Marks (40%) - Average of 2 Skill tests / Practicals of 30 marks each is to be conducted during the semester, and then should be converted to 20 marks.

Note: If student Remaining absent in PR-ESE shall be considered as ABSENT in PR-ESE

Legends: L-Lecture, T-Tutorial/Teacher Guided Theory Practice, P-Practical, ESE-End Semester Examination, PA-Progressive Assessment

@Internal Assessment, #External Assessment, *#Online Examination

5. GENERAL GUIDELINES FOR INDUSTRIAL TRAINING

The Industries/Organizations can be Government/Public limited/Hospital/or Private family enterprises.

- Duration of Industrial Training: 8 weeks in Final Semester as per the credits of the programme
- Training Area: Students should be trained in large and medium scale Industry / Organization. However, despite the best efforts by the institute, if large and medium scale Industry / Organization are not available to all students then, students can also be placed in small scale Industry / Organization.
- Skill Knowledge Partner: Students should identify one of the following sector from mentioned below list of industries to carry out Industrial Training.
 - 1. Fire Departments/ Fire Brigade
 - 2. MIDC Fire Department
 - 3. Maharashtra Fire Service
 - 4. Factories and Plants like Petrochemical, Steel, Fertilizers, BARC, Power plants, High Rise buildings, Facility Management companies

Note: If Student is employed in any of the above sector, he shall opt for training in his own organization.

6. EXPECTATIONS FROM SKILL KNOWLEDGE PARTNER (SKP)

Helping institute in developing the following competencies among students

- Soft Skills i.e. Communication, Presentation and others.
- Life Skills i.e. Time management, Safety, Innovation, Entrepreneurship, Team building and others
- Hands-on Practices i.e. Shop floor Implementation and Quality Assurance aspects.

FS

7. ROLE OF PARENT DEPARTMENT OF THE INSTITUTE

- Collecting information about Industry / Organization available for training along with capacity.
- Institutions have to enter into MOU with number of SKPs(Industries/ Organizations) for accommodating all the enrolled students for the mandatory
- Student and mentor allocation as per the slots available for in-.plant training (Desirable mentor- student ratio is 1:15).
- Communication with Industry / Organization available for training along with capacity and its confirmation
- Student enrollment for training.
- Issuing letter to the Industry / Organization for the training along with details of students and mentors.
- Principal/ HOD/ Faculty should address students about industrial safety norms, rules and discipline to be maintained in the Industry/ Organization during the training before relieving students for training.
- The faculty member during the visit to Industry/ Organization will check the progress of the student in the training, his/ her attendance, discipline and project report preparation.
- Mentors to carry out progressive assessment of the students during the training through Progressive Assessment (PA).
- End Semester Examination(ESE) assessment by mentor along with Industry / Organization expert as external examiner.

8. ROLES AND RESPONSIBILITIES OF THE STUDENTS

Following should be informed to students in the letter deputing them for the training, an undertaking for this should also be taken from them

- Students would interact with the mentor to suggest choices for suitable Industry / Organization. If students have any contact in Industry / Organization (through their parents, relatives or friends) then same may be utilized for securing placement for themselves and their peers.
- Students have to fill the forms duly signed by authorities along with training letter and submit it to training officer in the industry on the first day of training. Student should also carry with him/her the Identity card issued by institute during training period.
- He/she will have to get all the necessary information from the training officer regarding schedule of the training, rules and regulations of the Industry / Organization and safety procedures to be followed. Student is expected to observe these rules, regulations, procedures.
- Students should know that if they break any rule of industry or do not follow the discipline then industry can terminate the training and send back the student.
- It is the responsibility of the student to collect information from Industry / Organization about quality assurance methods/specifications of machines and raw materials/maintenance procedures/ production planning/work ethics/professional practures/organizational structure etc.

- During the training period students have to keep daily record of all the useful information in Log book
- Maintain the Diary/Logbook and get it signed from mentor as well as Industry / Organization Training in-charge.
- In case they face any major problem in industry such as an accident or any disciplinary issue then they should immediately report the same to the institute.
- Prepare final report about the training for submitting to the department at the time of presentation and viva-voce and get it signed from mentor as well as Industry / Organization training in-charge.

9. FORMAT FOR TRAINING REPORT

Following is the suggestive format for the training report, actual format may differ slightly depending upon the nature of Industry / Organisation. The training report may contain the following

- Title page
- Certificate
- Abstract
- Acknowledgement
- Content Page
- Chapter 1. Organizational structure of Industry / Organisation and General Lay Out
- Chapter 2. Introduction of Industry / Organisation (Type of products and services, history, turn over and number of employees etc.)
- Chapter 3. Types of major equipment/instruments/ machines used in Industry/Orgainzation with their specification, approximate cost and specific use and their routine maintenance.
- Chapter 4. Manufacturing Processes along with production planning and control methods and standard Operating procedures.
- Chapter 5. Testing of raw materials, components and finished products along with quality assurance procedures.
- Chapter 6. Major material handling product and procedures.
- Chapter 7. Safety procedures followed
- Chapter 8. Particulars of Practical Experiences in Industry / Organisation if any in Production/ Assembly/ Testing/Maintenance.
- Chapter 9. Short report/description of the project (if any done during the training)
- Chapter 10. Special/challenging experiences encountered during training if any (may include students liking & disliking of work places)
- References /Bibliography

10. SUGGESTED LEARNING STRATEGIES

Students should visit the website of the industry where they are undergoing training to collect information about products, processes, capacity, number of employees, turnover etc. They should also refer the handbooks of the major machines and operation, testing, quality control and standard operating procedures and practices used in the industry. Students may also visit websites related to other similar industries as their learning resource.

FS

11. TENTATIVE WEEK-WISE SCHEDULE OF INDUSTRIAL TRAINING

The industrial training is a common course to all programmes; therefore the industry / Organization selection will depend upon the nature of programme and its related industry. The training activity may vary according to nature and size of Industry / Organization. The details of activities to be completed during 8 week wise Industrial Training schedule should be planned by the Industry. The evaluation of Industrial training will be done on the basis of skills acquired by the student during this 8 weeks period.

EVALUATION SHEET FOR PA OF INDUSTRIAL TRAINING

| Sr. No. | Enrollment Number | Name of Student | Marks by Mentor & Industry Supervisor jointly | Marks by Industry Supervisor | Marks by Mentor Faculty | Total Marks |
|------------|----------------------|--------------------|---|------------------------------------|-------------------------------|----------------|
